

OPTIMA POULTRY

BROAD SPECTRUM ACTIVITY AGAINST

Bacteria

Algae

Yeast

Viruses

Fungi

BKCAQUA
water sanitizer

BKCAQUA

water sanitizer

Maintaining drinking water quality for poultry is an important nutritional aspect as birds consume water at twice the level of feed. One prime factor which determines the drinking water quality is its microbial load. Therefore, it should be of primary concern for poultry producers to minimize the microbial load of water. As Various researches indicate that water supplies are much vulnerable to microbial contamination and this is true even with the farms with good management system So, **BKCAQUA** is proven and trusted water sanitizer to minimize the microbial load of drinking water and reduce disease incidences, thus improving overall health of poultry birds.

COMPOSITION

Benzalkonium chloride I.P
Didecyl dimethyl ammonium chloride
Polyhexamethylene biguanide hydrochloride
Polyhexamethylene biguanide

FEATURES

Effective even in presence of organic matter and having higher stability in variable pH

BENEFITS

Effective against bacteria, viruses, fungi, yeast, algae

DOSAGE

1-2 ml / 10 liter of drinking water
or as per recommendation of Veterinarian

PRESENTATION
5 Liter
pack
